

FARCAST Brand Identity Guidelines

LOGO

Please don't adjust or edit the logo in any way including altering color or proportion, rotating, or rearranging elements beyond the provided. The logo should be displayed as solid white when on a dark background. "Farcast" showcases the Gotham typeface while "Biosciences" is designed in Din.

TYPOGRAPHY

DIN OR ROBOTO

Din (on the left) is the primary typeface and should be used for **headlines** and **typographic call-outs** in marketing materials. Roboto (on the right) may be used as a substitute, but the two fonts should **not** be used together. Normal and Condensed versions may be utilized for both.

DIN ROBOTO

GOTHAM OR ARIAL

Gotham should primarily be used for **body copy**. It is straight forward and easy to read. Its multiple weights help establish a clear hierarchy and draw the reader's attention to important content. Arial is used for communications where Gotham isn't available. Common uses include PowerPoint decks, website body copy, and emails.

LOGO COLOR PALETTE

The color palette is a key indicator of the Farcast brand. It is rich, confident, and forward-thinking. Navy is the primary color, and purple is the secondary color.

PANTONE	RGB
281C	30, 40, 89
CMYK	HEX
100, 93, 33, 31	1E2859

PANTONE	RGB
2582C	177, 79, 196
CMYK	HEX
42, 78, 0, 0	B14FC4

CLEARSPACE

The clearspace around the logo is equal to the height of the Farcast F. This applies to all versions of the logo.
